Network module for J1939

The FX3U-J1939 communication module allows the connection of FX3G/FX3U/FX3UC series PLCs to a J1939 network. J1939 is a CAN based protocol used for communication with motors, generators and compressors.

In a J1939 network are no master or slave stations. All nodes may receive each others' messages. Standard messages contain up to 8 bytes of data, extended messages contain up to 250 bytes of data.

Up to 75 standard messages and 4 extension messages can be sent and received.

The FX3U-J1939 is compatible with CAN Layer 2 communication. In this mode, a FX3U-J1939 can send and receive up to 42 messages on a CAN network.
