Batteries

Buffer battery

The lithium battery Q6BAT is the replacement for the battery integrated for data backup in any MELSEC modular series.

iQ-R series System Q L series

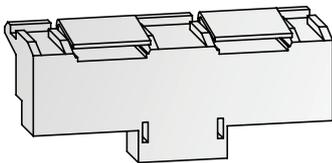

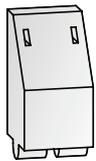

The batteries Q7BAT and Q8BAT offer a larger capacity than the Q6BAT. Because of the also larger dimensions, these batteries are mounted externally of the CPU module.

Connection cables with connectors

Assembled cables

The cables Q40CBL-3M and Q40CBL-5M serve as connecting cables for I/O modules with 40-pin plug connection.

The cables are prefabricated, i.e. a 40-pin connector is already attached to one cable end.

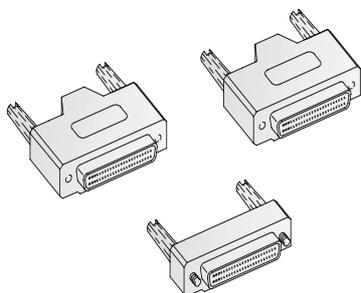

iQ-R series System Q L series

The cables FA-CBLQ75M□□ are ready made cables for the connection of the positioning modules QD75D1/D2/D4 or QD75P1/P2/P4 to a Mitsubishi Electric servo amplifier MR-J2-Super or MR-C.

Accessories for the MELSEC modular series

37 and 40-pin connectors

Connectors A6CON

These connectors are available in four different connection versions that differ in the way the leads are connected.

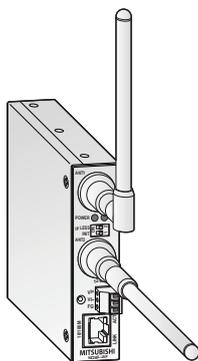

These connectors are required for all 32-point modules that connect to external signals via a 37-pin or 40-pin plug connection.

iQ-R series System Q L series

Whilst for the connectors A6CON1 to A6CON3 and A6CON1E to A6CON3E the cable is attached straight into the connector, in the case of the A6CON-4 the lead is angled.
