We, **DBK David + Baader GmbH** hereby declare under our sole responsibility the **compliance with the applicable substance bans as of Annex XVII** of the above mentioned regulation for products listed below we sell / ship directly or via distributors to **Omni Ray AG**. Should any of the products fail to comply with the applicable substance bans, we shall let **Omni Ray AG** know by return, which of the products / materials are affected.

We, **DBK David + Baader GmbH** hereby also declare under our sole responsibility that none of our products listed in attachment 1 that we sell / ship directly or via distributors to **Omni Ray AG** contains any SVHC as of the actual Candidate List above a threshold of 0.1%w/w with exception of lead in PTC - heating elements (→ see attached information / attachment 2). In case that products / materials contain any of the SVHCs mentioned in the actual Candidate List with concentrations above the allowed threshold, we inform **Omni Ray AG** by return, which of these substances are contained, by part number and name of the substance contained.

Based on the European Union (EU) regulation of chemicals (REACH), the list of SVHC (substance of very high concern) is updated regularly. In the list published on June 27<sup>th</sup>, 2018, **lead** (CAS 7439-92-1) has been classified as a dangerous substance for the first time.

The complete list can be found on the ECHA (European chemicals agency) website <https://echa.europa.eu/candidate-list-table>. The regulation covers all substances throughout Europe that consist of more than 0.1% of a SVHC listed substance, regardless of their industry, product type and field of application.

We, **DBK David + Baader GmbH**, hereby inform you that most of our installed PTC ceramic elements - with few exceptions - are affected by this regulation.

Lead is solidly bound in PTC ceramics due to the manufacturing process which is why a discharge is not to be expected. Additional instructions for safekeeping are therefore not required.

From today's point of view, there will be no unexpected effects in terms of the REACH regulation until 2024.

For technical reasons, a complete substitution of lead during the PTC manufacturing process is not possible, as of today.

**DBK David + Baader GmbH, 08.02.2022**
